NEWS RELEASE

Date 25th February, 2014

Commission Fees Reduced to 0.3%

We chose the name "In Bitcoin We Trust" as a play on words, in that Bitcoin and the Protocol is based upon maths, and 2+2 will always be 4, and as such the Trust in Bitcoin is infallible. However, there also must be a certain level of trust within the platform, wallet holder, or exchange that you use.

MtGox was an important foundation to the community, from which many Exchanges that have emerged owe some sort of acknowledgement to. Without MtGox building that initial foundation, we would not be here today. We at IBWT greatly feel for the damage this has caused the Bitcoin community, though we have faith that it will recover quickly.

It is an unfortunate truth, that Bitcoin businesses, especially Exchanges, face not only the hardships of national and self regulation, and the ever-looming banking presence. But Exchanges must also face the nefarious people involved in the Bitcoin community that would damage and try to break the very same wealth that they are stealing. The consequences as shown by this unfolding situation, can be seen that a financial institution under the Bitcoin economy cannot simply conjure up more Bitcoin. If they cannot meet losses, then they will feel the repercussions.

The IBWT platform has been unaffected by the malleability issue. As previously stated, our custom designed software tracks transactions in a thorough manner that is not only dependent upon the transaction hash ID.

To help rebuild the trust that customers must have in their crypto-currency exchanges, IBWT has reduced its commission fees to 0.3% as a temporary measure to help build the confidence customers can and should have in Exchanges.

Sincerely,

The IBWT Team.

Information on how to use our services and platform can be found at <https://ibwt.co.uk/>. If you wish to register as a customer then please make sure you read and understand the [terms of service](#).
